Dear Attorney General,

14 year old Keren-Happuch Akpagher was a student in the Nigerian capital Abuja and looking forward to the next summer holidays with her mother. But on 22 June 2021 she died of the consequences of a rape that she presumably suffered in school. Cause of death was a sepsis triggered by a condom that was left in her vagina.

I urge you to please see to it that an impartial, transparent investigation of her death and presumable rape will take place immediately. Please put all persons responsible on trial without recurring to the death penalty.

Sincerely
